

## Jiffy Packaging Company Ltd - update on Plastic Tax and recycled content

From April 1<sup>st</sup>, 2022, the UK Government will introduce new legislation regarding Plastic Packaging and the use of recycled materials.

Any plastic-based packaging products supplied which do not contain 30% recycled plastic content will be subject to a tax collected by HMRC.

We are pleased to confirm that here at Jiffy Packaging Company Ltd we are well advanced in our preparation for this, and the following below products are already available with a minimum of 30% recycled content;

All Jiffy bubble products (bags, rolls, pouches, sheets etc.)  
All Jiffy bubble lined mailer products,  
Furniguard and Furnisoft products  
Foam products (10mm thickness and above)

And of course, our Jiffy Padded bags have always been manufactured without any plastic content and have always been fully recyclable.

The labelling on the above products has been changed to reflect this.

Development work continues on our current products not yet achieving the 30% recycled content level. We look forward to updating you further once these can be commercially produced with this level of recycled material content.

Kind regards

*R Gregg*
