
BUBBLE

ABRIBUBBLE® - ASTROBUBBLE® is an air cushion film consisting of bubbles formed between two or more mono extruded lightweight polyethylene film layers.

ASTROSUPRABUBBLE® is a barrier bubble film consisting of coex extruded polyethylene films with a nylon barrier to reduce air loss. Coex construction provides easy tear.

TECHNICAL DATA & APPLICATIONS

- rolls, sheets and pouches are available in various bubble diameters and in different densities
- stitched covers are available and are durable packaging solutions
- our air bubble films are exceptionally suitable for lamination with all kinds of foils, such as HDPE, LDPE, Kraft paper, metallized and aluminized foils
- rolls can be supplied with tear off perforations

BUBBLE

PROPERTIES

- shock resistant
- light and economical
- transparent
- practical and easy to use
- dust-free and odour-free
- 100% recyclable where facilities allow

SPECIFICATIONS

THICKNESS

- from 36 μm up to 400 μm
- Europe up to 150 μm

DIAMETER OF THE BUBBLES

- Europe 10 mm, 18 mm, 25 mm and 30 mm
- UK 10mm / 25mm

WIDTH

- Europe from 50 cm up to 3 m
- UK 30 cm to 2.5 m

LENGTH

- from 50 m up to 200 m in relation to the diameter of the bubble
- UK Mini rolls available at 5 m

OTHER SPECIFICATIONS ON REQUEST

from 10 cm on in width and 3 m in length
