

# PROTECTIVE BUBBLE

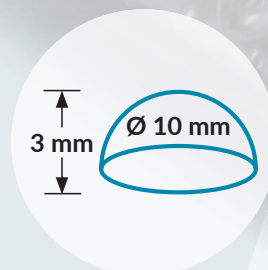

With more than 50 year experience in protective packaging, we understand better than anyone that having the right bubble at the right moment is key.

With over 17 factories in Europe, we have increased our supply reliability and speed of delivery.

**Our Protective Bubble has a height of 3 mm, a diameter of 10 mm and is always on stock!**

Keeping your products safe with our Protective Bubble involves choosing the right type of bubble based on the characteristics of the product and the shipping conditions.

We offer 3 types of Protective Bubble: **EzyBubble**, **UniBubble** and **SecuBubble**.

## CHOOSING THE RIGHT TRANSPORT BUBBLE TO DO THE JOB

### 1 DEFINE YOUR PRODUCT TYPE AND STYLE OF SHIPPING

EzyBubble	UniBubble	SecuBubble
<ul style="list-style-type: none"> <li>✓ Light product</li> <li>✓ Short shipping cycle</li> </ul>	<ul style="list-style-type: none"> <li>✓ Medium-light product</li> <li>✓ Short &amp; predictable shipping cycle</li> </ul>	<ul style="list-style-type: none"> <li>✓ Heavy products</li> <li>✓ Fragile &amp; valuable products</li> <li>✓ Long &amp; unpredictable shipping cycle</li> </ul>

### 2 DECIDE HOW YOU WILL PROTECT YOUR PRODUCT

	EzyBubble	UniBubble	SecuBubble
 <p><b>Interleaving</b> Layers of bubble between your products</p>	✓		
 <p><b>Wrapping</b> Wrap your whole products in bubble</p>		✓	✓
 <p><b>Surface protection</b> Protect the surface of your products with bubble</p>			✓

## ALWAYS ON TIME

## SUSTAINABILITY IS IN OUR DNA!

We strive to maximise the use of recycled content. That is why we are strongly committed to recycling and reusing raw materials. By investing strongly in our R&D, we always stay ahead in the development and innovation of new sustainable products.

OCEAN GREEN (OG) bubble, recognisable by its green colour, is made from up to 100% recycled material and is 100% recyclable. Ocean Green bubble is key part of Abriso Jiffy's sustainability story.

**EzyBubble**, **UniBubble**, and **SecuBubble** are also available in our sustainable Ocean Green range. Enjoy the same quality and protect the planet and your products with **EzyBubble OG**, **UniBubble OG** and **SecuBubble OG**.

**Contact us for more information on our journey towards sustainability.**

## DO YOU HAVE SOMETHING SPECIAL TO TRANSPORT?

We've got you covered!

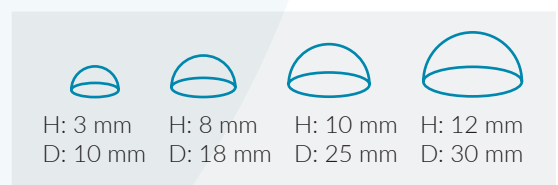

<b>Bags &amp; Sleeves</b>		Bubble bags are used to protect all kinds of products, big or small. Our bags can be made in different sizes & qualities, depending on your needs. Bubble bags are mainly used as shock-absorbent packaging in transport or storage. For your electronic products please see our antistatic bubble bags.
<b>Stitched bubble</b>		Stitched Bubble covers are used as durable packaging for high-quality products, such as furniture, bikes, car parts, ...
<b>Macro perforation</b>		Perforated bubble wraps are used for products that need to be water-permeable or condensable during transport or cold storage. Particularly for certain food products, perforated bubble is the ideal solution.
<b>Laminates</b>		Laminated bubble products are designed to protect heavy, fragile products or products with sharp edges/corners. Example laminates are Kraft paper (to ensure discrete and safe shipment of your valuable goods), PP fleece or PE foam (ideal to protect your delicate products against being scratched) or LDPE foil (to ensure additional protections against tear and shocks).
<b>Sheets</b>		Bubble sheets are primarily used as shock absorbing intermediate layers.
<b>Die cutting</b>		Special objects need special protection. Die cutting makes it possible to deliver you a bubble sheet tailor-made to the size and form of your product.
<b>Tear-off perforation</b>		Tear-off perforation has the same advantage as sheets, but are supplied on rolls. This makes it for easier to handle for some applications. Tear-off perforation can be supplied to your specific measurements.
<b>Thermal bags</b>		Thermal bags are used for keeping products at a stable temperature (warm or cold). The isolation properties of the bubble wrap, in combination with a reflective layer (such as aluminium), make thermal bags the ideal solution for this.
<b>Short Rolls</b>		Our bubble wrap is also available in short rolls of 3-30m in length, ideal for the DIY market, house moves, small packing jobs or when larger rolls of bubble are not required
<b>Antistatic bubble</b>		Anti-static bubble wrap protects sensitive electronic components and devices from electrostatic discharge for safe storage and transportation.

## DIFFERENT BUBBLE SIZES

Our Protective Bubble is also available in various bubble diameters and in different qualities and widths.

### General Specs

Thickness: from 35 µm up to 250µm    Length: from 3 m up to 200 m depending on the diameter of the bubble  
Width: from 10 cm up to 300 cm

**By selecting the right bubble wrap category and applying it correctly, you can significantly enhance the protection of your products during shipping, regardless of their size or fragility.**
